Summary

My name is Gandha, a software developer from Indonesia with over 3 years of experience in front-end development. I specialize in creating smooth, pixel-perfect web and mobile apps using React.js, React Native, Next.js, JavaScript and TypeScript. I focus on delivering seamless user experiences and optimizing performance. I also have experience with backend development, building RESTful APIs, and working with databases, allowing me to contribute to end-to-end solutions.

Relevant Experience

React Native Developer - VirtualSpirit

Sept 2023 - Present (Remote) // Kuala Lumpur, MY

- Developed a Dating Application (Vinita): Contributed to the development of core features, including seamless swiping functionality, real-time chat, and advanced filtering options. Improved the user experience and boosted engagement by optimizing performance and Collaborating effectively with cross-functional teams, including UI/UX, backend, and QA teams.
- Contributed to the design and development of a white-label mobile app project by implementing a modular architecture approach. This method ensured scalability, flexibility, and efficient maintenance, while enabling the app to be customized easily for different clients.
